

ARPSC meeting June 17, 2019

- Sign up sheet was passed around for Common Ground
- ARES Connect
 - It's not working for signing up for meetings now. This is being looked into and Jim has passed on this information.
- Field Day - This coming weekend June 22 to 23 in Rayner Park in Mason, MI
 - Equipment will be loaded up at CMARC's club room on Friday at 5pm.
 - Facebook event has been created at:
<https://www.facebook.com/events/416381142425255/>
 - Information including schedule, press release, rules, and contest details can be found at <http://www.centralmiarc.com/fieldday.php>
- Hamfest
 - September 7th at the Okemos Conference Center, an indoor venue
 - More information can be found at: <http://www.centralmiarc.com/hamfest.php>
- New Card Process
 - Make sure you're up on all your ICS classes
- Future training on ARES Connect
 - There are thoughts of more training with a time to be determined
- Skywarn On Call
 - May need another person to help out with the rotation
 - Responsibilities would include keeping an eye on the hazardous weather outlooks and letting Net Control Operators know when there is a chance of severe weather requiring a weather net -- this does not necessarily mean that you would need to be a net control operator during the nets while on call
- Common Ground
 - Cameras have been charged up, kits have been groomed, and the cameras are in good working order
 - 201 and 205 forms are being finished up by Dennis
 - Camera locations haven't been finalized as of yet - it may be toward this Friday before those locations are known
 - Most likely it'll be the bridge, ramp, one in the park (vendor row), and roof of the fire station
 - Possibility of setting up a camera somewhat remotely at vendor row if needed - to be monitored by floaters
 - Talk of a wide angle on the roof to leave pan/tilt/zoom camera for other areas
 - 146.58 simplex for communications with the 146.94 repeater (100 Hz) as a backup
 - Saturday and Sunday have the highest need for additional volunteers
